PROFILE SUMMARY

I am seeking a part-time, full-time, freelance, or other internship opportunity as a software engineer (intern) in the Information Technology and Services and Other sectors. A dedicated and results-driven software engineer with expertise in Python, HTML, CSS, JavaScript, PHP, and Java. Skilled in developing efficient, scalable, and user-friendly solutions, I am passionate about leveraging my technical abilities to create impactful software applications. With a focus on continuous learning and innovation, I aim to deliver high-quality solutions that meet user needs and drive success.

PROJECTS

AI Powered Venomous species Prediction System(Final Project)

2025

https://github.com/0KaveenNimsara0/wildlife_safty_website/tree/Development
https://github.com/0KaveenNimsara0/Wildlife_safty_Backend/tree/Development

Developed "Wildlife Safety," an AI-powered web app to identify venomous snakes in Sri Lanka, featuring a TensorFlow CNN (92.5% accuracy), Flask REST API, React.js frontend, and real-time first-aid guidance.

Ai Powered hosue price Prediction

2025

https://github.com/0KaveenNimsara0/kaggel_competition_Prediction-interval-competition-II-House-price-latest

Developed a full-stack house price prediction web app using React, Node.js/Express, Python ML models, and MongoDB, featuring accurate predictions with confidence intervals, secure authentication, real-time analytics, and a responsive UI.

Mega City Cab System

2025

<https://github.com/0KaveenNimsara0/CabBooking>

Developed a Java EE cab booking web app using JSP, Servlets, and MySQL with MVC architecture, design patterns (Singleton, Factory, Strategy), real-time reservations, billing, reporting, and a responsive frontend.

Gallery Cafe Site

2024

https://github.com/0KaveenNimsara0/Gallery_cafe

Developed a dynamic, mobile-friendly café website using PHP, MySQL, HTML, CSS, and JavaScript with category-based menus, reservations, user authentication, and a responsive UI.

eventora Web Site (Group Project)

2024

Developed a dynamic, mobile-friendly café website using PHP, MySQL, HTML, CSS, and JavaScript with category-based menus, reservations, user authentication, and a responsive UI.
